THE NEW BRUNSWICK SEED POTATO INDUSTRY

New Brunswick has a world-wide reputation as a consistent supplier of high quality virus-tested seed potatoes. This reputation has been achieved through the co-ordinated efforts of growers, industry representatives, Provincial and Federal Governments. Working together, they have developed a number of methods and practices which assure a high standard of seed potato quality.

The Bon Accord Elite Seed Potato Farm provides the basic stock to the industry. The Farm is operated by the N. B. Department of Agriculture. Stringent disease control measures and careful management practices are routinely followed. Potatoes produced on the Farm are monitored for potato viruses PVX, PVS, PVA, PLRV, PSTV, and bacterial ring rot. In addition, samples are sent to the Florida winter test each year. This rigorous monitoring assures that only superior quality seed enters the N. B. seed system.

An additional program has been integrated into the production system at Bon Accord. Potato plantlets are produced in test tubes from meristems of virus-free plants. These plantlets are then grown in a greenhouse and the tubers they produce are entered into the field production system on the Farm. This meristem plantlet system provides a means of rapidly bulking new varieties as they are required by the industry.

Foreign delegations tour the Province each year. They visit a number of seed potato growers as well as the Provincial Seed Farm and have an opportunity to gain information on all seed production projects. They observe the high standards maintained throughout the industry and review the management practices followed by seed growers.

One of the visits which receives a lot of attention is the Variety Screening and Multiplication Project. A wide range of varieties or seedlings are maintained at this site. It allows for an early evaluation of the market potential in New Brunswick of new seedlings or varieties and allows seed growers to gain information on production practices prior to introducing a new variety on their farms. It is a co-operative effort of the N. B. Department of Agriculture and the N. B. Seed Potato Growers Association.

The Potato Disease Eradication Act provides the legislative authority to eradicate several named potato diseases from the Province. Any potato production over 1/4 hectare must be grown from Certified or higher class seed. Inspection of growers' premises and disinfection of storage and equipment may be required to assure disease eradication. In addition, the Act provides for the establishment of seed potato production areas. The growers in these areas agree to follow rigorous disease control practices. Disinfection units, vehicle dips, and weigh scales are located at the entrance to an area. These facilities provide disinfection services for trucks and containers and ensures that seed is packed and transported under sanitary conditions.

New Brunswick seed potato growers demonstrate a dedication to high quality production standards. The N. B. Seed Potato Growers Association, formed in 1977, is active in the development and implementation of

programs designed to ensure enforcement of disease control and eradication programs. It sponsors seminars and tours on topics of grower interest and administers the Aphid Alert Service and Disinfection Service.

This grower dedication, backed up by strong Provincial and Federal Government commitment, results in the production and delivery of seed potatoes with a high quality standard known around the world.

SEED POTATO CERTIFICATION IN CANADA

The Plant Health Directorate of Agriculture Canada is responsible for inspection and certification of seed potatoes in Canada. All seed lots must be laboratory tested prior to planting. A minimum of three field inspections is required for the Elite Classes and two for the Foundation and Certified Classes. Zero disease tolerance is strictly enforced for the first three field generations, and a minimum tolerance for the remaining classes.

The limited generation program begins with the Pre-Elite Class produced from disease-free greenhouse tubers or transplants planted directly in the field. From this first field generation, the seed advances a class or more each year, if it meets the inspection standards for that class.

Multiplication of disease-free nuclear stock for field production starts when meristems are taken from selected tubers, which have been extensively tested for all plant pathogens. The resulting plantlets are multiplied in culture using nodal cutting techniques. They are eventually grown to maturity in glass or screen houses, or transplanted directly to the field. Controlled conditions, as well as testing throughout the process, ensure that the tubers produced from these plantlets are completely disease-free. They are then planted in the field to produce Pre-Elite seed.

Post-harvest testing is mandatory for all classes of seed to the Foundation level. Samples are grown in Florida test fields and/or examined in the Seed Potato Certification Laboratory, where testing is also conducted for those viruses or diseases which cannot be detected by visual inspection. Tubers are carefully inspected during grading, packing and shipping as well. They must meet prescribed standards prior to inspectors issuing seed tags or certificates for the shipment. This check guarantees both the quality of the seed, and the sanitary conditions under which it is handled.

CLASS	FIELD INSPECTIONS	DISEASE TOLERANCE
Pre-Elite	3	0.00%
Elite I	3	0.00%
Elite II	3	0.00%
Elite III	3	0.25%
Elite IV	2	0.25%
Foundation	2	0.50%
Certified	2	2.00%

Seed potatoes must be graded and sized prior to sale. the size classes are as follows:--

Round Varieties

A Size - 50-80mm

B Size - 30-50mm

Long Varieties

A Size - 45-70mm

B Size - 30-45mm

Contract Size - any size specified by the purchaser

Tubers of all seed classes must meet the Grade standard specified below.

1.

Disease or Defect	Percentage
Soft rot or wet breakdown	0.0
Dry rot including late blight	1.0
Malformed and damaged	2.0
Scab and Rhizoctonia	
a) slight	10.0
b) moderate	5.0
Stem-end discolouration due to topkilling, frost, heat or drought with penetration from 6 millimeters to 13 millimeters.	4.0

2. The percentage of tubers in a lot of seed potatoes of any grade showing symptoms of viruses including leafroll necrosis shall not exceed the percentage permitted by field inspection for all viruses for that grade.

3. The percentage of tubers in a lot of seed potatoes of any grade that are of a variety foreign to the variety of which the lot generally consists shall not exceed the percentage permitted by field inspection for that grade.

4. The number of tubers in the aggregate affected by diseases and defects, not including slight scab, slight Rhizoctonia and stem-end discolouration shall not exceed five percent of the total number of tubers in any lot of seed potatoes.

5. All tubers except two percent in any lot of seed potatoes shall be firm and well shaped.

6. At the point of shipping, not more than 5 per cent of tubers in a lot shall be affected by pressure bruising on over 10 per cent of their surface.

7. At the point of shipping, not more than 10 per cent of the tubers in a lot shall have sprouts longer than 2 cm.

8. No tubers in any lot shall be washed.

Elite seed classes must be grown on a Provincial Seed Farm or by an approved seed grower. The Province of New Brunswick operates an Elite Seed Potato Farm at Bon Accord. Its purpose is to produce high quality seed for the New Brunswick seed potato industry under the most rigid phytosanitary conditions.

New Brunswick has three classes of seed growers:--

Type of Seed Grower	Class of Seed Produced
Elite seed growers	Pre-Elite, Elite I, Elite II, Elite III and Foundation
Recommended seed growers	Elite III, Foundation and Certified
Other seed growers	Foundation and Certified

The Elite and Recommended growers are eligible to receive seed from Bon Accord at the Elite II class. In addition, the Elite seed growers obtain Nuclear, Pre-Elite, and quantities of Elite I from Bon Accord to supplement their own production.

To supplement the field inspection program, the Food Production and Inspection Branch, Agriculture Canada, operates the Florida Seed Potato Test and a laboratory post harvest testing program.

All seed potato lots must be laboratory tested for bacterial ring rot prior to sale or prior to planting. This testing requirement applies to all planting stock in New Brunswick, whether the end use is for seed or non-seed purposes.

The rigid phytosanitary standards imposed by this Certification System and enforced by the Officers of Food Production and Inspection (F. P. & I.) assure the production of a consistently high quality seed crop.

POTATOES CANADA

Potatoes Canada is an organization representing all segments of the potato industry in New Brunswick and Prince Edward Island. Its primary role is to expand the off-shore exports of seed potatoes and to co-ordinate the efforts of the Federal and Provincial Governments together with the export industry to achieve this objective.

Overseas trials are essential to evaluate variety performance in foreign countries. Through such variety trials, Potatoes Canada attempts to identify and advance varieties both at home and abroad which will satisfy demand and will improve the variety mix which Canada has to offer. Such trials led to the early realization that many markets demanded yellow as well as white fleshed varieties. To fulfil an immediate demand, the Canadian industry was urged to acquire and introduce foreign bred varieties, including American releases, to meet the yellow flesh as well as other market requirements.

Stronger efforts are also being made in the National Breeding Program to fulfil the requirements of the off-shore markets. Yukon Gold is the first Canadian bred yellow fleshed variety to be certified for sale as seed in Canada. Other Canadian bred yellow fleshed seedlings are rapidly being advanced for certification. In addition, efforts are now being made to select varieties adapted for earlier shipping.
